Cadrille™

Cadrille™ Quality Quartz Timepieces

with Liquid Crystal Continuous Display and LED Display

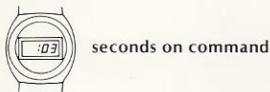

High styled, full selection, the Cadrille™ collection at unusually reasonable prices is unmatched in its excellence of quality workmanship and materials. Cases are Swiss made, enhanced by top quality bands and bracelets. All Cadrille™ watches possess a phenomenal 99.99% accuracy, virtually unheard of in watches in this price range. All liquid crystal quartz models display hours and minutes continuously. LED models are equipped with brighter read-out and crystals designed for superior performance in sunlight.

Digital read-out makes knowing the exact time a snap. No gears, no motors, no springs, no moving parts, no lubrication, no cleaning!

Extensive research and development have indicated that, based on extrapolation of life tests, under normal operating conditions of the watch, OPTEL liquid crystal displays have a life time of one million hours (approximately 100 years).

Guarantee:

Should any Cadrille™ watch malfunction within one year of date of purchase, OPTEL will replace free of charge. (Guarantee does not cover power cell or bracelet nor does it apply if module or crystal have been damaged by abuse or accident.)
